FOR IMMEDIATE RELEASE

SCARECROW MOTION ACTIVATED SPRINKLER OFFERS ALL-NATURAL ALTERNATIVE TO CHEMICAL ANIMAL REPELLENTS

Successfully Protect Your Plants and Ponds From Predators

Victoria, BC (November, 2005): Finally, there's a highly effective, environmentally friendly and humane way for gardeners to keep cats, dogs, deer, large birds, rabbits and many other unwanted animals out of their cherished gardens. It's the scarecrow with a "brain" – the ScareCrow Motion Activated Sprinkler by Contech Electronics Inc.

Endorsed by the Gardeners' Club of America, the ScareCrow is the most intelligent scarecrow ever invented. It attaches to a standard garden hose and senses movement the same way a security light does, by detecting the heat and movement of an unwanted visitor. When the ScareCrow detects movement, it releases a three second burst of water towards the intruder. The effect of the sudden noise, movement and spray of water is both startling and immediate – animals quickly flee the area and avoid returning in the future. Amazingly, these results are achieved using a minimal 2 to 3 cups of water per deterrence.

The computerized "brain" behind the award-winning ScareCrow requires only one 9-volt battery. The energy efficient circuitry can "fire" the ScareCrow thousands of times to easily protect gardens or ponds.

"The option of using water to repel animals is the cleanest, quickest and most environmentally friendly choice available today," said Erik Djukastein, president of Contech Electronics. "Based on consumer satisfaction ratings, we believe the ScareCrow is changing the way people deal with pest animals. Wildlife and humans can now co-exist in greater harmony than ever before without employing fences, chemicals or noisemakers."

SCARECROW

2-2-2

The ScareCrow was specifically designed not to trigger with the movement of smaller, innocuous critters like songbirds or mice. However, most animals like cats, dogs, rabbits, raccoons, deer, herons or geese are easily seen and repelled with the 3-second bursts from the ScareCrow sprinkler.

The ScareCrow is simple to install and safe to use in any ornamental, flowering, or vegetable garden. Many customers have enjoyed success using the ScareCrow as an animal deterrent around their ponds. The ScareCrow is backed by a 30-day money-back guarantee and is also supported by a two-year limited warranty.

The ScareCrow is available from garden centers, hardware stores, and mail order retailers. For additional product information or retail outlets, contact Contech Electronics at (800) 767-8658 or visit Contech's website at www.scarecrowinfo.com.

Contech Electronics Inc., based in Victoria, British Columbia, was formed 17 years ago. President Erik Djukastein and his late father, Klaus Djukastein, made it the company's mission to allow animals and humans to enjoy a more harmonious relationship. Their focus on developing innovative new devices that really work has made Contech a leader in the animal control industry. Contech is also known for the ScatMat Electronic Pet Training Mat, the CatStop Ultrasonic Cat Deterrent and the WaterDog Automatic Outdoor Pet Fountain. For more information about Contech or any of our products, call 1-800-767-8658 or visit www.scarecrowinfo.com.
